Regarding: Beach Volleyball, Archery, Swimming.

- 1) Swimming in Williamsburg on top of a possible 1100 megawatt power plant.
- 2) Archery and Volleyball right by the city's only Radioactive toxic waste transfer station.
- 3) The Olympic Village in Long Island City is right next to the world's largest underground oil spill and NYC's largest wastewater treatment plant.
- 4) Displacement of residents and abuse of eminent domain.
- 5) Public Safety – Staffing reductions and Engine Company closings in the FDNY (Fire Department of The City of New York) have compromised public safety. First response Engines to the proposed swimming venue and the Olympic village have been closed by Mayor Bloomberg.
